Major projects from the field of Youth

Year	Title of the Project	Programme / Contractor	Role	Description
2016-2018	LET'S BE INNOVATIVE! Development of Creativity, Innovation and Entrepreneurship for Primary School Teachers – InnoTeach project	Erasmus+, KA2: Strategic Partnerships for school education - Development of Innovation	Korona plus d.o.o., Project Leader: B. Likar	The basic aim is to trigger different way of thinking in primary schools and to show that innovation is crucial for success – anywhere; in all subjects, in daily situations in school, in real life challenges. In the first step, teachers will be trained and equipped with appropriate tools for creative work. Teachers will also be encouraged to use the knowledge in practice. They will identify a concrete challenge (a problem from school, educational process, local environment...) and perform all the necessary phases which are crucial if they wish to create, develop and implement innovative solutions and bring their idea to life: 2016-2018. Project budget: 208,279Euro.

Presentation of the Organization

Institute for Innovation and Technology, Korona plus d.o.o.

Institute for Innovation and Technology is an innovatively oriented organisation from Slovenia with its mission closely linked to rising innovativeness in schools, economy and among the youth in Slovenia, which is an integral part of EU. The organisation operates in close cooperation with a wide network of specialists of various professional profiles and collaborates with national and foreign organisations. The Institute has been developing the area of creativity, innovation-open innovation and technology transfer for over two decades.

Professionally, morally and financially the projects and therefore the development of innovative young people in this period were supported by many national and also international institutions/projects. About 100 successful research, applied, technological and other national and EU projects have been carried out (Ministries, Public Agency for Technology of the Republic of Slovenia, Public Agency of the Republic of Slovenia for Entrepreneurship and Foreign Investments, Chamber of Commerce and Industry of Slovenia, the ESF– European Social Fund, Phare MOCCA, Leonardo da Vinci, FP7 etc.) numerous books and comics published, several award competitions, numerous conferences and exhibitions implemented at home and abroad, several cooperation with the economy established, tenths of widely recognised and expert papers... Owing to the uniqueness of their concept, the Institute was invited to present its concept at the United Nations' headquarters in Geneva as one of the best European concepts as well as at the Closing Conference of the European Year of Creativity and Innovation in Stockholm.

In addition, the Institute for Innovation and Technology has developed ten patents, numerous innovations, countless models and copyright works, many of which proved to be extremely marketable - nationally and internationally.

Project Leader's short Biography

prof. dr. Borut Likar, MBA

Likar is a full professor at the University of Primorska. His work encompasses management of creativity, R&D, technology, and innovation processes in the field of educational system and industry. He is the author of hundreds of scientific, expert and other publications, initiator of several international projects and the author of patents, models and copyright works - many proved to be extremely marketable. He is an innovator and a recipient of many international awards for his innovations and for scientific achievements. Among numerous lectures he has given, the talks at the United Nations' headquarters in Geneva and at the European Parliament in Brussels were met with a particularly wide response. Likar is also the amateur photographer, where he is particularly interested in creative and innovative approaches to photography. He also engages in writing aphorisms, which were published internationally.
